DIMENSIONS OF "B" FILING CASE: 17 3/8 inches long, 7 5/8 inches high, 7 3/8 inches wide.
ED- The receipt box is still collectable and easy to find. The wooden box is more rare.

This Filing Case is very conveniently arranged and will accommodate about one hundred and fifty customers' accounts. Each customer is provided with an envelope, upon the outside of which is written his name and the total amounts shown upon the duplicate charge slips. These slips are filed away in the envelope. The "B" Filing Case may thus take the place of a customers' daybook and ledger, and is largely used in small stores doing a limited amount of credit business.

The "Deadwood Check Box" is used in connection with check device registers in some systems, and is supplied gratis in such cases.
